

TOM CAMPBELL MAKES MORE FRIENDS

**HUNT ADMINISTRATION
EXTRAVAGANT; BUDGET
LAW IS URGED AS SO-
LUTION OF EXPENSE, IS
CANDIDATE'S VIEW.**

Special to the Journal-Miner.

BISBEE, Oct. 6.—More like an audience which greets a lecturer than attends a political rally, the Tom Campbell meeting in Lowell tonight distinguished itself for calm, serious and thoughtful attention. There was not a suggestion to disturb it, and short, snappy addresses each met with the same close attention and appreciation.

Tom Campbell was at his best, in voice and presentation of State issues. When he arose to speak after a brief introductory speech by Chairman John Redmond there was a spontaneous ovation which lasted several minutes. He referred briefly to the Bisbee meeting of the night before which was packed with disturbers, and said he did not mind what happened. As a boy in Prescott, he said, there were three factions in the little town, in which the boys had to either run, fight or talk, and he said he belonged to all three of them. He talked on State economics and pointed out the extravagance of the Hunt administration, basing his statements on figures. A budget law for the State, he said, was the solution of the excessive cost of State government. He said that Hunt takes no interest in the departments of the State save the penal institution and those under the board of control. Speaking of industrial conditions in the State he said that if he is elected governor he will treat all classes, capitalists and laborer, rich and poor, big and small, exactly alike to the end that the people will know that their persons and property are in safe keeping under the administration of the State.

H. E. Matthews was the first speaker, outlining his constructive program for State schools and receiving frequent applause. H. L. Eads, candidate for congress, spoke forcibly on the Mexican policy and aroused an enthusiastic response of approval from the big audience. George H. Smalley spoke of the fundamentals of taxation which he pledged he would follow to the end that all classes of property would have equal rights and no special privileges would be granted to any class. Normal McKenzie, joining the party here, received an ovation lasting five minutes. He expressed in quaint phrases, with shuffling feet and an irrepressible radiance of ready Irish wit, his qualifications for mine inspector and kept his audience in an uproar for ten minutes. Doane Merrill spoke of the absent candidates and presented J. A. Campbell, who was on the platform, Republican candidate for State treasurer. Campbell did not speak. J. Harry Cloonan and John L. Gust, the latter joining the party here tonight, spoke: Gust making a forceful talk and pledging the enforcement of the prohibition amendment and all laws.

Campbell and his party spent six hours visiting miners during the day at the Calumet & Arizona mine.

pectors know much geology, but it is surprising what the past has revealed in the short course in geology. The university is organized to reach the people and to serve the people, and the short course is one of its many ways of so doing.

A pamphlet has been issued on the short course for miners which may be had upon application to the dean of the College of Mines and Engineering, University of Arizona, Tucson, Arizona.

TOM CAMPBELL LEAGUE IS FORMED

(From Saturday's Daily.)
A number of Tom Campbell's friends got together yesterday afternoon and took the first steps towards organizing the "Tom Campbell League of Yavapai County."

There are few men who are better acquainted and have more friends in Yavapai county than Tom Campbell. He has lived in this county from boyhood and during that time he has been largely in the public eye.

As he has progressed, he has always remained the same so that every friend was always sure that Tom Campbell would be interested in whatever he might have to say, without regard to his party affiliation and could be sure of getting careful consideration for anything in which he might wish to secure Mr. Campbell's help.

They know that when Tom Campbell is governor, the same condition will prevail and that when they go to him he will receive them with the simple directness that has always characterized his actions.

It is this confidence in Campbell's interest and sincerity that has made for him his army of friends in Yavapai county in all political parties and in all walks of life.

There are many who do not know Tom Campbell who, if they did, would want to vote for him.

It is through the big majority that is expected from Yavapai county that the friends of Mr. Campbell hope to assure his election on November 7th.

For this reason it is essential that all his friends get together and do everything they can towards securing every possible vote for Campbell in Yavapai county. This means the sending out of many letters and much special literature.

It is for this purpose that the "Tom Campbell League" has been organized. The dues are \$1. All are invited to join without regard to party affiliations.

Believes Bannie Will Be Big Mine

(From Tuesday's Daily.)

M. P. Lacey, who arrived from Walker yesterday, is enthusiastic over the showing made in the Bannic mine basing his belief on observations made a few days ago. He states that the main shaft has reached a depth of over 200 feet, and drifting therefrom aggregates over 1,000 feet. The vein ranges from 18 inches to six feet in width, and gold-copper values run to as high as \$98 per ton. Mr. Lacey brings samples from the greatest depth where a fine oxide ore is being developed. Indications of a sulphide condition being entered are apparent, and it is his opinion a big copper will ultimately be proven. The Bannic, he says, is occasioning very much comment from the evidence at the greatest depth.

Midnight Test Is A Busy Mine Camp

(From Tuesday's Daily.)

T. J. Laird, who was in the city yesterday from Groom creek, stated that the reviving of the Midnight Test, by a California mining operator named Mr. Merrill, is proceeding under conditions which would indicate a practical conception of the business. The unwatering of the old workings is the initial move, and 82,000 gallons of water were brought up the first day, opening the shaft for observation to a depth of 160 feet. About 450 feet are to be unwatered, and development will begin. All machinery has been repaired since the new operator assumed charge, and a large line of exploration is being mapped out. Mining men of that field, conversant with the showing of the property at its greatest depth, predict a successful undertaking.

COPPER ORE STRUCK ON POLAND GROUP

(From Sunday's Daily.)

William Christman, who arrived from Walker yesterday, reported considerable excitement in mining circles over the showing made in an outlying claim of the Poland group, which is under development by Geo. H. Morris and Amos Swigert under a lease. The striking of a copper pyrite ore is exceptional in that locality, the belt predominating in gold. The claim in past years had never been explored to any extent until the above operators took charge.

MOST IMPORTANT MINING DEAL IS CONSUMMATED

(From Saturday's Daily.)

The Union group of gold mines in Chaparral, held under an escrow agreement by D. M. Lacey, for a long time, were sold yesterday, the payment of a satisfactory sum of money to the owner, John S. Jones, being made.

Involved in this deal is a very large sum, but the amount is withheld, reports being in circulation, however, that approximately \$300,000 will be the consideration. Under the terms agreed upon, the next payment is due and will be met, under a guarantee from those associated with Mr. Lacey on November 15. Thirty days later another sum is to be paid over, while on January 10, several thousand dollars will be forthcoming.

It was learned yesterday that some of the wealthiest men of St. Louis, Chicago and other Eastern cities are to become identified with this huge mining movement. Funds will be available for carrying out a very elaborate line of development and the immediate placing in action of a new type of reduction plant known as the Harting process, to treat a minimum of 100 tons per day.

The Union has been extensively developed during the past 20 years. Underground workings comprise over 7,000 feet, demonstrating one of the most attractive gold properties in the State. During the ownership of Mr. Jones he has met development expenses by milling and shipping the higher grade product to smelters, the last batch of ore giving returns of over \$200 to the ton. In the group are 18 full claims, and it is freely admitted by mining men that this property is the key to the mineral door of that region.

Mr. Lacey's interest in the district, dating back to several years ago, is due to his knowledge obtained in making many trips of inspection to the Union holdings, acquainting himself with absolute conditions underground, and in bearing the cost of mining and shipping from different zones.

The Union is to be turned over at once to the new operators, and M. N. Andrews, who is conversant with mineralogical conditions in that belt, from his past management of properties nearby, will be superintendent. During preliminary movements by which the property is to be shaped up and placed in condition for large operations, one of the largest camps in the county will be established.

Announcement of the sale of the Union yesterday created much comment in mining circles of this community, Mr. Lacey being congratulated upon bringing the deal to a successful termination.

PLEADS GUILTY TO THEFT OF AUTOMOBILE

(From Saturday's Daily.)

Charles Tarabui pleaded guilty in the Superior court yesterday morning to a charge of grand larceny and will be sentenced next Monday. Tarabui was arrested in California recently after, it is alleged, he had stolen an automobile belonging to B. B. Perez, of Jerome, and driven it to that State. Tarabui was employed by Perez at the time.

Harry McDowell, alleged to have broken into a room at Seligman, was arraigned on a charge of burglary and pleaded not guilty. His trial was set for November 22nd. McDowell was unable to secure bondsmen and was remanded to the custody of the sheriff until his trial. Jose Gutierrez, charged with rape, entered a similar plea and his trial was set for the same date.

Jose Cliff and Francisco Cruz, charged with having robbed the home of Frank Thompson and Buster Gardner, were also brought into court. Cliff pleaded guilty to a burglary charge recently and his sentence was yesterday continued to November 22. Cruz, who pleaded not guilty to the charge, will be tried on that date.

MISS HARLAN IS BRIDE OF E. W. SANDERS

(From Friday's Daily.)

Miss Grace Harlan became the bride of Elwood W. Sanders, yesterday, the ceremony taking place at 3:30 o'clock at the parsonage of the West Prescott Methodist church. Rev. Joel Hedgcock officiating. They left later for a honeymoon trip through Southern Arizona, with the Roosevelt dam as their first destination.

The bride is a native of Prescott, daughter of Mr. and Mrs. John Harlan, and for some time past has been in the employ of W. A. Cline as an accountant. The groom is in charge of the plant of the Prescott Gas and Electric Co.

ANOTHER COPPER COMPANY GOES INTO ACTION

(From Sunday's Daily.)

The reviving of the old Stein copper near Kirkland by a new corporation, known as the Lucky Strike Mining Company, was announced yesterday by miners arriving from Zonia.

Preliminary operations are under way by a close association composed mainly of Phoenix investors. Among them are J. C. Brown, formerly of the St. Michael hotel, of Prescott, Arthur Luhrs, of the Commercial hotel, of Phoenix, Norman H. Morrison, F. H. Larsen, Dr. Belt, of that city, and N. P. Kayler, who is on the ground as consulting engineer. The new company has a capital stock of only \$120,000. Mr. Brown was an original shareholder of the old Stein Company, and individually provided a large sum from his private resources to bring the property into an excellent rating, before suspension took place. Under the former management the group was extensively explored with several shafts, one reaching to a depth of 160 feet, another of 108 feet, of 82 feet, and with drifting from each, all workings aggregating over 700 feet. Ore conditions determined were satisfactory and in addition to the good grade of copper ore, gold values also were attractive, showing as high as \$6 to the ton. Under the arrangements perfected for reviving this copper it is stated that the above operators have paid into the treasury to begin initial operations over \$20,000.

Behind this movement to revive an old copper is said to be the high production from the Vesuvius and the McMahon groups which adjoin the Lucky Strike, both shipping regularly high grade gold-copper ores.

BIG DEMAND FOR STOCK OF U. V. CONSOLIDATED

JEROME, Oct. 7.—The books of the United Verde Consolidated Copper Company will open at 8 o'clock on the morning of Wednesday, October 11, for the sale of 200,000 shares of treasury stock at 75 cents. An official permit was issued by the corporation to this week.

In order to prevent brokers taking advantage of the public demand for U. V. Consolidated, artificially to boost the price before the stock is even issued, the company has arranged for 75-inch display advertisements in the leading dailies of Arizona and in the large cities of the country. These advertisements will appear Sunday morning and warn the public that the opening price of U. V. Consolidated is 75 cents a share. The principals of the company are determined to control the price of the stock to this extent but realize that they can exercise no control after issuance.

Copy for the advertisements was transmitted Friday night by telegraph. It is the largest single order for advertising ever placed by wire in the West, and the largest ever placed direct by a mining company. Present indications are that the treasury stock will be oversubscribed five or six times. Brokers have applied, it is said, for more than half a million shares. Most of the stock will be sold direct to the public however, the management states.

At the first meeting of the stockholders, held in Jerome as soon as the company was granted a charter by the corporation commission, Robert W. Wingfield, president of the Camp Verde State Bank and one of the wealthiest merchants of Northern Arizona, was elected president. Dr. Paul McIntosh was made vice-president, Dan Robinson, postmaster of Clarkdale, treasurer; E. C. Farrell, secretary.

Within a week the company will let a contract for 20,000 feet of diamond drilling on its two groups of claims. Representatives of two big diamond drilling concerns have been on the ground several days. The contract will call for two drills operating simultaneously.

Engineer J. D. Sperr, formerly with the Tom Reed and United Verde, has reported favorably on the Consolidated holdings. His report is even more enthusiastic than that of Engineer George A. Bethune, who has been employed to supervise development. Like Bethune, Sperr recommends the diamond drill method of locating the ore bodies.

HEAD OF BIG CATTLE COMPANY IS DEAD

(From Sunday's Daily.)

John N. Hays, president of the Hays Cattle Company of Peoples valley, died in Oakland, Cal., September 27th and was buried several days later at Lemoore, Cal., his old home. Mr. Hays was 38 but a few days. He was a son of Colonel Hays, an officer in the Confederate army, who was killed in action, and a great-grandson of Daniel Boone. The deceased was born in Kansas City, Mo., went to California with his mother and sisters in 1871 and spent most of his time, until his death, in Fresno and Kings counties, Cal. Mr. Hays was the father of Mrs. Reginald W. Forbes and Ray Hays, of Kirkland.

If you want an engraved calling card, give the Journal-Miner your order.

JOINT TUNNEL FOR DUNDEE AND VERDE EX.

(From Sunday's Daily.)

JEROME, Oct. 7.—Dundee-Arizona is now in the spotlight, its stock having almost doubled in market value within the past week, rising from \$1.50 to \$2.75.

The tip was out last Monday to get aboard but no one knew any particular reason why there should be an advance as there had been no unusual developments at the mine to justify it.

Now the news comes from New York that a deal has been consummated with the Verde Extension for a joint tunnel which will develop both properties. Alexander Mackay, a British capitalist arrived from Europe on Monday and the deal was closed. He is one of the heaviest stockholders, being associated with Fred S. Stephen who bought the property long before the United Verde Extension made its phenomenal strike on the same fault about 1,000 feet northwest of Dundee.

The Dundee tunnel and shaft have already developed a blanket of carbonate ore over the property and a zone of rich conglomerate ore has been encountered near the surface. The water level was tapped in the shaft at 450 feet and pumps have been installed, and it is believed that the sulphide zone will be struck at a depth of 850 feet.

The company is capitalized for 500,000 shares, par \$1, with 425,000 shares issued, leaving 75,000 shares in the treasury with a working capital of \$143,500. The president is Alexander Mackay of Dundee, Scotland, who is interested in mining and other enterprises in various parts of the world, while the directors are W. C. Foster, secretary of the Phoenix Savings Bank & Trust Company, Fred S. Stephen of Dundee and Phoenix, Charles M. Shannon, former owner of the Shannon Copper Company, and L. H. Chalmers, attorney, of Phoenix. J. W. Hubbard, who has been in the Jerome district for 25 years is the superintendent.

PROTECTION IS URGED FOR FARMERS

FT. WORTH, Tex., Oct. 7.—In a memorial to congress issued today, entitled "The American Farmer and His Government," H. N. Pope, president of the Association of State Farmers' Union favors protection on all agricultural products, declares that no country can thrive half protected and half free, insists that there is no such thing as a hyphenated tariff and asks that cotton be protected by a 12-cent minimum loan from the government.

The memorial which goes into an exhaustive analysis of the subject says in part: "The cotton producer is the only class of farmers who has always been compelled to sell what he produced on a free market and buy what he consumed on a protected market, and as a consequence the cotton fields of the South have more tenants, more poverty and more suffering than any other agricultural area on the Western Hemisphere."

"This condition should challenge, but not baffle, American statesmanship. No matter what one's views may be on the government, a policy of protection or of free trade, all will agree that no country can reach its highest degree of prosperity half protected and half free. This country should assist all industrials or none."

"No production or industry can thrive selling in a free market and buying in a protected one."

"We have no desire to bring all agricultural and manufactured products to the level of cotton; we only ask that cotton be lifted to the level of other industries."

"It matters not whether the tariff is levied for protection or for revenue. It offers to an industry the same assistance."

"There is no such thing as a hyphenated tariff."

"A policy of universal protection is in the interest of the American farmer for he sells more than he buys."

"Protecting the factory without protecting the plow is an unpardonable discrimination and should not be tolerated by the farmer of the nation. Neither should any one agricultural product receive protection unless all agricultural products receive protection."

HOME PRODUCTS TO BE SHOWN AT FAIR

(From Saturday's Daily.)

The home economics department of the Northern Arizona Fair is attracting the interest of the women of Northern Arizona. Daily inquiries are received regarding this department, which is divided into two sections, the textile fabrics and the culinary and pantry stores, with Mrs. O. H. Tucker, superintendent of the former and Mrs. J. D. Bethune in charge of the latter.

There are six classes in the textile fabrics department: Children's department, under 16; plain sewing, women's department; household fabrics; crocheting, knitting and tatting; needle work and a special class for exhibitors under 16 years of age. Every article in these departments must have been made by the exhibitor, who must be a bona fide resident of one of the five northern counties of Arizona for the last five years. Entries will close at 5 o'clock, October 17, and exhibits must be delivered at the fair grounds not later than 5 o'clock, Wednesday, October 18. All exhibits should be addressed to the "Home Economics Department, Northern Arizona Fair, care of the Chamber of Commerce." No article in this department can be removed until the close of the fair, except upon written permission of the superintendent.

On the entry of each article for exhibition, a card will be furnished the exhibitor specifying the department, the number of the lot and the entry, and this card must remain attached to the article during the fair, the exhibitor retaining duplicate check, which must be presented to obtain the article exhibited. Where there are many exhibits in one class, the management reserves the right, after they have been judged as a whole, to divide the remaining articles into distinctive classes and award first and second ribbons carrying no cash prizes.

In the culinary department there are nine divisions: bread, doughnuts and cookies; pies; cakes; preserves; pickles; home-made candy; special exhibits and Mexican dishes. The preserves and pickles must have been prepared by the exhibitor during the years 1915 and 1916, and never before exhibited. Canned fruits, etc., may be tested to satisfaction of awarding judges. Calicyle or other acids must not be used in the preservation. Fruits must be labeled when presented for exhibition and all entries in this department must be received not later than 10 a. m., Thursday, October 19.

Beside the cash awards in this department, the following premiums are offered by the Kerr Manufacturing Company: for the best exhibit of fruits packed in "Economy" jars, 12 quart Kerr "Economy" jars complete with caps and clamps; for the best exhibit of vegetables packed in "Economy" jars, 12 quart Kerr "Economy" jars complete with caps and clamps; for the best exhibit of fruit packed in Kerr Wide Mouth "Self-Sealing" Mason jars, 12 quart Kerr Wide Mouth "Self-Sealing" Mason jars complete with caps and clamps; for the best exhibit of Mason jars, 12 quart Kerr "Self-Sealing" Mason jars.

The strike on the New State being fully confirmed, W. S. Wilhelm, who returned a few days ago from California, stated yesterday that the property will be equipped at once with an air compressor to drive drills that the main level may be extended and greater shaft depth given. He said: "Exploration during my absence has been satisfactory. The so-called strike or hitting the shoot of the mother lode was not unexpected. The values are, however, somewhat surprising, as well as the rich vein in size larger than what appeared in the first discovery made a few months ago. That we have determined an excellent proposition is a settled fact, and the deeper the shafts get the better are conditions. My company has decided that now is the time to drive ahead with all force, and this will be done."

Will Rush Work On The New State

(From Tuesday's Daily.)

The strike on the New State being fully confirmed, W. S. Wilhelm, who returned a few days ago from California, stated yesterday that the property will be equipped at once with an air compressor to drive drills that the main level may be extended and greater shaft depth given. He said: "Exploration during my absence has been satisfactory. The so-called strike or hitting the shoot of the mother lode was not unexpected. The values are, however, somewhat surprising, as well as the rich vein in size larger than what appeared in the first discovery made a few months ago. That we have determined an excellent proposition is a settled fact, and the deeper the shafts get the better are conditions. My company has decided that now is the time to drive ahead with all force, and this will be done."

HOPE TO STRIKE EXTENSION U. V. ORE BODY

JEROME, Oct. 7.—Now that the mine workings of the Jerome Victor Extension Copper Company have been freed from their overburden of water under conditions which practically assure permanent relief from that trouble, the work of development is being pushed with three shifts of miners. As an insurance against similar trouble in the future, however, the labor of the big pump on the 700-foot level is to be lessened by the installing of a 250-horse power electric pump. There is no question but the two pumps will adequately handle the present and any future flow that may be encountered.

The directors of the company, several of whom are actively identified with the large copper mines of the Lake Superior country, are lending financial and advisory support to the Victor Extension management and will supply additional machinery equipment as it is needed. The company has about \$125,000 in its treasury, accumulated by the sale of its stock at from \$1 to \$3 per share, and has placed its property in charge of George W. Salisbury, who for a number of years was a member of the engineering staff of the United Verde, adjoining.

Salisbury is drifting on the 1,200-foot level of the Victor Extension with the object of tapping the continuation of the United Verde ore bodies. No. 3 United Verde shaft has a depth of 1,950 feet, and it is stated that the laterals on the 1,650-foot and 1,800-foot levels have been driven well toward Victor Extension lines. It is also stated that the United Verde Company will sink its new shaft—to be known as "No. 6"—to the east of the railroad depot at Jerome and in the vicinity of the Victor Extension's boundary. It is to be a three-compartment, deep-working shaft and through its medium a large area of great prospective value will be developed.

Operations on the 1,200-foot level in Victor Extension workings will demonstrate the value of this area beyond the United Verde's lines. The drift on the 1,200-foot level of the Victor is out from the shaft a length of 175 feet and will be extended 75 feet farther. There a crosscut will be run about 50 feet to tap, on its dip, the downward extension of the deposit exposed on the 700-foot level. The vein matter on the 700-foot level, although leached and considerably shattered, shows copper mineralization across a width of 30 feet.

OLD COPPER MINE IS STEADY SHIPPER

(From Sunday's Daily.)

C. E. Champie, who revived the old Pittsburg copper mines of Castle Creek district a few months ago, reports that property under successful operation, regular monthly shipments of the higher grade ores being made to El Paso. Production is curtailed owing to the long haul by freight wagons to Wickenburg, 20 miles distant, and only ores of a grade of about 18 per cent are handled. He has been advised that a market will be opened at Wickenburg in a short time where the big sampling mill is established, now under construction. This new market will afford an outlet to other mines in that field, now actively developing.

For quick and artistic job work, the Journal-Miner is the place.

OCTAVE GETTING READY TO MILL BIG TONNAGE

**DEVELOPMENT FOR THE
PAST 2 YEARS REPORTED
AS WARRANTING REDUC-
TION OF PRODUCT.**

(From Sunday's Daily.)

According to reports in circulation the Octave Mining Company has decided to re-establish its reduction plant, by equipping the mill and cyanide works with steam power, this adjunct having been removed to another locality many years ago under a former management, when the Arizona Central Power Company was about to be formed.

This reduction movement results from two years of development given under the present management, a huge tonnage having been determined in the workings of over 1,200 feet in depth. The new shaft sunk on the Little Joker claim of the group connected up all old workings, and the product from that zone is said to have established a remarkable mineral condition, exceeding, in fact, that zone from which the unusually high grade gold ores were mined many years ago. The Joker shaft was sunk in virgin ground when the present company succeeded to ownership over two years ago, and since that time but very little publicity has been given to operations.

Will Rush Work On The New State

(From Tuesday's Daily.)

The strike on the New State being fully confirmed, W. S. Wilhelm, who returned a few days ago from California, stated yesterday that the property will be equipped at once with an air compressor to drive drills that the main level may be extended and greater shaft depth given. He said: "Exploration during my absence has been satisfactory. The so-called strike or hitting the shoot of the mother lode was not unexpected. The values are, however, somewhat surprising, as well as the rich vein in size larger than what appeared in the first discovery made a few months ago. That we have determined an excellent proposition is a settled fact, and the deeper the shafts get the better are conditions. My company has decided that now is the time to drive ahead with all force, and this will be done."

Poor Health Drives Helgeson To Suicide

(From Tuesday's Daily.)

Poverty and poor health drove A. H. Helgeson to suicide last Friday night near Tempe, the method he adopted to destroy himself being by hanging. Helgeson until recent years resided in this city, and followed stage driving for a living in early days, later taking charge of freight teams to mines. It was stated yesterday by a friend of the deceased that he was bitten by a centipede about 12 years ago, and afterward his health gave way. He removed to Maricopa county to seek a change of climate, but his condition did not improve. It is stated he was a member in good standing of the Knights of Pythias, and by this order he was laid away in Phoenix last Saturday.

THIEVES MAKE BIG HAUL OF DYNAMITE

(From Sunday's Daily.)

The discovery was made yesterday that the giant powder storehouse owned jointly by the Bashford-Burmeister Co. and the Hill Hardware Co., situated on the track of the S. F. P. & R. railroad, near the old race track, had been entered by thieves. Not until an inventory is made of the contents, will the loss be known. It is believed that a full wagonload of powder was taken, this supposition being founded on tracks of a wagon being seen near the building, together with the interior showing indications of having been disturbed. There is no clue to the thieves, and the motive cannot be ascertained for such a wholesale cleanup of this commodity.

WORK STARTS ON NEW RAILROAD LINE

(From Saturday's Daily.)

The first steps looking to the building of the Verde Extension railroad projected to connect Clarkdale in Yavapai county and Mesa were taken Thursday, when a large party of engineers and their assistants left Phoenix for the Verde, where active surveying will start at once.

The outfit consisted of three large wagons drawn by four-mule teams, three saddle horses, to be used as pack horses when the really hard country is reached, and about 15 men.
